

STREAMLINE YOUR SERVICE DESK WITH A RELIABLE, SECURE ITSM SOLUTION

NTR Cloud for ITSM boosts efficiency, reduces support costs and improves service levels by enabling you to automate and manage key IT processes across complex and geographically dispersed environments. Your IT department can proactively manage thousands of assets and gain a real-time view of all system activity from a single, easy-to-read dashboard.

Easy to implement with plug-and-play modularity, NTR Cloud for ITSM features a robust IT administration toolkit, remote access and control technology, and an ITIL-mapped approach to workflow optimization. Integrate NTR Cloud for ITSM with your existing business software to enhance functionality while leveraging current investments in CRM, help desk, billing, alerts and backup systems. NTR Cloud for ITSM scales to your changing business needs with dynamic software-as-a-service delivery.

NTR Cloud for ITSM
delivers secure, flexible and
affordable service desk
modularity tailored to your
business needs and budget.

Key Benefits

- » **Easy to Install:** 100% cloud-based with rapid SaaS implementation and an easy-to-use, streamlined user interface
- » **Value for Money:** Priced lower than competitor solutions, with free updates and upgrades included in the subscription
- » **Superior Service Levels:** Remote troubleshooting and 24/7 customer support enhances service delivery and minimizes issues
- » **Added-Value Integration:** API architecture ensures seamless integration with over 200 business leading applications, including Salesforce, SAP and Oracle
- » **Proactive IT Automation:** Proactively manage your IT infrastructure with automatic alerts that provide immediate knowledge of incidents
- » **Performance Metrics:** Fast-loading reports from a central dashboard demonstrate key performance indicators to improve efficiency and optimize ROI
- » **Data Privacy:** Data encryption, ISO 27001-certified data centers and socket server network guarantees complete privacy of your data

Gain a real-time view of all system activity from a single, easy-to-read dashboard.

Features
